

Please amend the application, without prejudice, as follows:

IN THE TITLE

Please amend the title as follows:

IN-GROUND CONTAINER STABILIZER FOR NURSERY ITEMS

IN THE CLAIMS

✓ Please cancel claims 6, 17-20, 22 and 24.

Please replace claims 1, 7, and 23 as amended herewith. The marked changes are shown on the attached pages entitled "Version with Markings to Show Changes Made".

- 21
Cont.
1. A stackable plant support comprising:
- an upper ring;
 - a lower ring;
 - at least one leg attached to the upper ring and lower ring, the leg adapted to support the upper ring and lower ring and engage the ground, the leg comprising a ledge shaped so as to permit application of a downward force by a plant support user to engage the plant support with the ground, the ledge defined by a bend in said leg, the ledge located below the position where the lower ring attaches to the leg;
 - wherein said at least one leg is an elongated U-shaped member comprising a closed end and an open end defined by two portions of the U-shaped member;
 - the upper ring is attached to said at least one leg proximate the closed end such that a loop is formed above the upper ring by the closed end of the leg;
 - the ends of the two portions of the U-shaped member are adapted to engage the ground; and

DI
could the plant support shaped to enclose plants and support plant
containers. *E*

D2 7. The stackable plant support of claim 1 wherein the ledge is defined by
a bend in the two portions of the U-shaped member. *E*

D3 23. A support member for a plant support apparatus, the support member
comprising:

at least one leg attachable to an upper ring and a lower ring, the leg
adapted to support the upper ring and lower ring and engage the ground;

the at least one leg comprising a ledge shaped so as to permit
application of a downward force by a plant support user to engage the plant
support with the ground;

wherein the ledge is defined by a bend in the at least one leg, the
ledge located below the position where the lower ring attaches to the at
least one leg;

wherein said at least one leg is an elongated U-shaped member
comprising:

a closed end and an open end defined by two portions of the U-
shaped member;

a portion of the upper ring adapted to attached proximate the
closed end of said at least one leg such that a loop is formed above the
upper ring by the closed end of the leg; and

the end of the two portions of the U-shaped member are
adapted to engage the ground; and

wherein the loop is positioned in a different plane as the two portions
of the U-shaped member at the open end.
